INTRODUCTION

A New Era in Chrome Mining and Processing

INOVANOS (Pty) Ltd stands at the forefront of the modern mining industry, pioneering a new, responsible standard in chrome extraction and processing. Established with a vision to harmonise industrial progress with environmental responsibility, INOVANOS is more than a conventional mining company; we are a catalyst for sustainable development and a hub of innovation. With strategic operations in Burgersfort (Limpopo), Kroondal, and Mooi-nooi (North West), we are positioned in the heart of South Africa's richest chrome deposits, enabling unparalleled efficiency and quality control.

Our identity is built upon the pillars of innovation, integrity, and impact. We believe the future of mining lies not only in delivering superior products but also in making a tangible, positive contribution to the communities in which we operate and preserving our planet for future generations.

The journey of INOVANOS began with a clear and powerful idea: to create a mining operation that would set new benchmarks for sustainability and technological advancement in South Africa's vital chrome sector. Founded by a dynamic team of visionary entrepreneurs -Yang Yongjian, B. Johnny Hamisi, and Lesego Makhoba- the company emerged from a shared recognition of the immense potential to innovate within traditional mining practices.

Since commencing operations, INOVANOS has rapidly built a reputation for reliability and excellence. Our growth has been steady and strategic, with a focus on building strong, lasting relationships with clients who value not only product quality but also corporate integrity. Today, INOVANOS stands proudly as a South African company contributing to national prosperity and demonstrating that responsible mining is not just possible, but profitable and essential for a sustainable future.

This profile outlines our journey, our principles, our operational excellence, and the visionary leadership that guides us as we mine chrome and refine the future.

VISION & MISSION

Our Guiding Principles: Purpose-Driven Leadership

At INOVANOS, our actions are guided by a clear purpose and a strong set of values. These principles form the bedrock of our corporate culture and serve as the compass for every decision we make, from strategic planning in the boardroom to daily operations on site.

Our Vision

To set new global benchmarks for operational excellence, environmental stewardship, and social responsibility in the chrome mining industry, becoming the partner of choice for stakeholders who share our commitment to a better future.

Our Mission

To be a leading and trusted producer of high-quality chrome concentrate, leveraging innovative technology and sustainable practices to deliver exceptional, measurable value to our customers, shareholders, employees, and host communities.

Our Core Values

Our values are the foundation of our identity and guide our conduct in all business dealings:

01 INTEGRITY

We conduct our business with unwavering honesty, transparency, and the highest ethical principles. We believe that trust is the foundation of all successful, long-term relationships.

02 INNOVATION

We relentlessly pursue new technologies and creative solutions to enhance efficiency, improve safety, and minimise our environmental impact. We foster a culture that encourages curiosity and embraces change.

03 SUSTAINABILITY

We are profoundly committed to protecting the environment and ensuring the long-term social and economic well-being of our host communities.

04 EXCELLENCE

We strive for the highest possible standards in every aspect of our work, from mineral extraction and processing to customer service and corporate governance.

05 SAFETY

The health and safety of our employees and contractors are our highest priority. We are unconditionally committed to creating a zero-harm workplace through rigorous training and robust safety protocols.

06 COLLABORATION

We believe in the power of partnership. We work collaboratively with our employees, customers, suppliers, and community stakeholders to achieve shared goals and create mutual success.

LEADERSHIP

Our leadership team combines decades of diverse, international experience with a unified vision for the future of mining.

B. Johnny Hamisi – Chief Executive Officer:

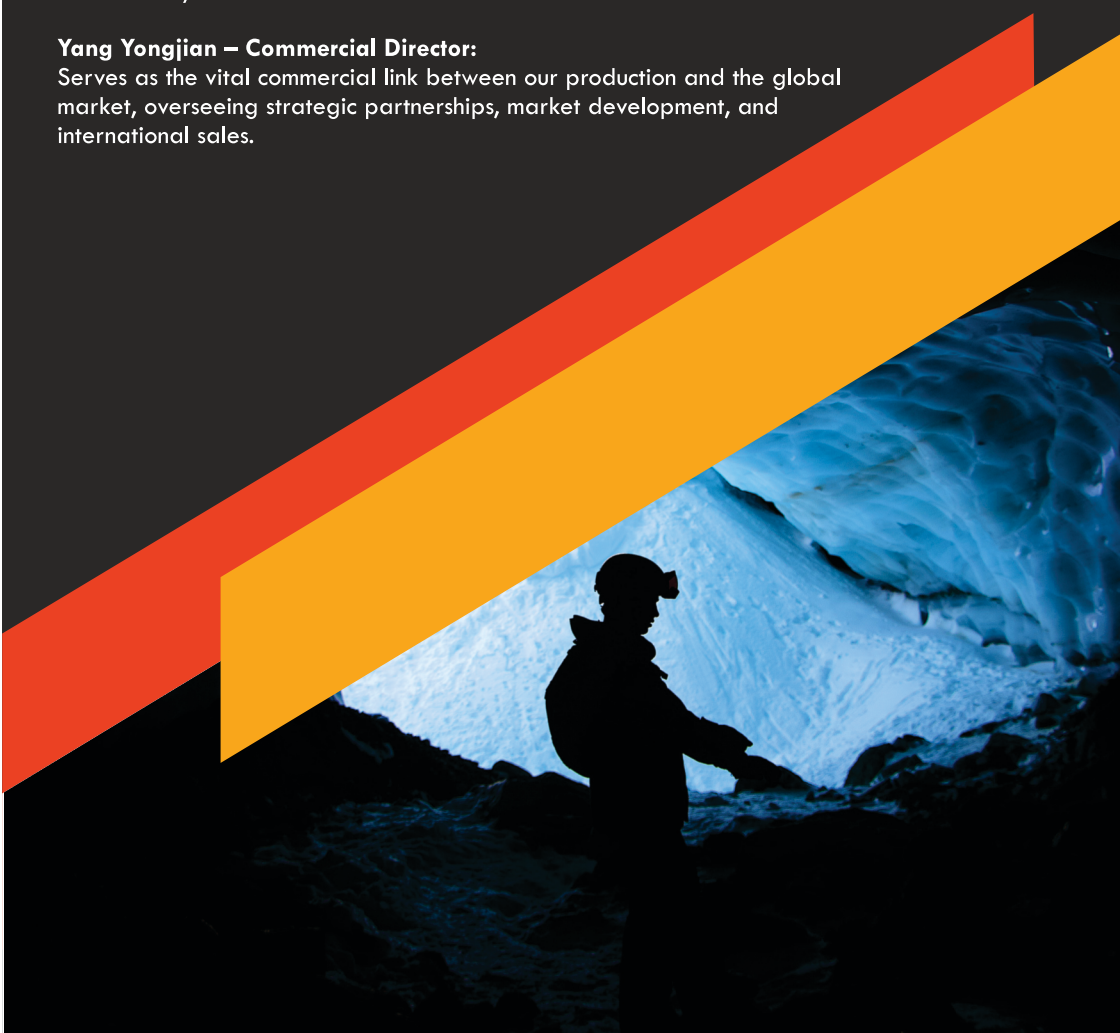

Leads INOVANOS with a unique blend of entrepreneurial spirit, legal acumen, technical expertise, and a visionary commitment to sustainable growth.

Lesego Makhoba – Operations Director:

The operational heart of INOVANOS, bringing extensive experience and proven leadership in chrome extraction, processing, and site management to ensure on-site efficiency and sustainability.

Yang Yongjian – Commercial Director:

Serves as the vital commercial link between our production and the global market, overseeing strategic partnerships, market development, and international sales.

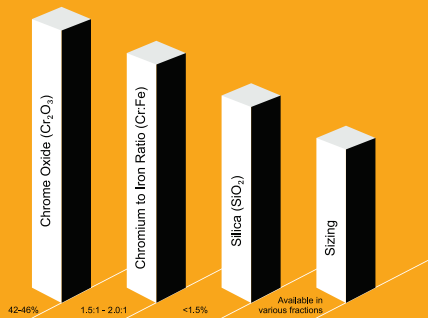

PRODUCTS & SERVICES

Excellence in Every Tonne

At INOVANOS, our product is more than a commodity; it is the result of a meticulous process centred on precision, quality, and responsibility. We specialise in the production and distribution of high-grade chrome concentrate, tailored to meet the exacting specifications of our diverse global clients in the ferrochrome, chemical, and foundry industries.

Our Primary Product: High-Grade Chrome Concentrate

We produce premium chrome concentrate derived from the rich deposits of South Africa's Bushveld Complex. Our product is renowned for its consistent quality, optimal Cr:Fe ratio, and low impurity levels, making it a preferred choice for high-performance applications.

Note: Custom specifications can be accommodated upon request

Operational Excellence: The Journey from Ore to Concentrate

Our advanced chrome washing facilities in Burgersfort, Kroondal, and Mooi-nooi are models of efficiency, transforming raw ore into high-grade, market-ready concentrate.

Ethical Sourcing: Our process begins with responsible sourcing from reputable, vetted mining suppliers located near our facilities. This localised strategy reduces transport costs and strengthens the regional economy.

Advanced Concentration: Our plants employ a multi-stage process using crushing, screening, and advanced gravity separation to isolate high-density chrome particles without chemical reagents.

Dewatering and Stockpiling: The concentrate is dewatered to precise client specifications before being stockpiled for quality assurance testing and dispatch.

Our Services: A Partnership Beyond the Product

INOVANOS is committed to being a long-term partner, not just a supplier. Our services are designed to provide a seamless, reliable, and efficient experience for our clients.

Integrated Distribution and Logistics: With our strategic expansion into distribution, we offer a fully integrated source-to-client supply chain. By managing logistics directly, we ensure greater reliability, reduced lead times, and complete transparency for destinations worldwide.

Uncompromising Quality Assurance: INOVANOS maintains fully equipped, on-site laboratories at each facility. Our technicians conduct rigorous analysis at every critical stage. A Certificate of Analysis accompanies every shipment, providing complete confidence in the product.

Dedicated Technical and Commercial Support: Our team provides dedicated support to ensure our product integrates perfectly into your processes. Our experts are available to discuss market trends, product specifications, and logistical planning to help you optimise your procurement strategy.

Let's Connect

We are ready to discuss your chrome concentrate needs, explore partnership opportunities, or answer any questions you may have about our company and operations. We believe in open communication and invite you to reach out to us through the appropriate channel below.
